August 19, 2009

This letter is in strong support of "*The Adventures of Captain Heart*," authored by Dr Eugene Lipov and his son, Sam Lipov.

Dr Lipov and his staff were kind enough to come to my school read their book to our students. The reaction from the kids was magical. Clearly, they enjoyed the presentation, but more importantly, it was evident from the discussion that followed that they had taken in some important knowledge about nutrition. We had lunch immediately following the book presentation, and I was delighted to see the number of children thoughtfully choosing the "healthier" foods, such as lean meats versus buttered noodles, or fruit versus candy. I sincerely believe this book has the potential to make a positive impact on childhood obesity; a challenge that has become an epidemic in this country.

Sincerely,

Kimberly A. Bianchini
